

FIA - Environmental Certification Framework and AUTOKLUB ČESKÉ REPUBLIKY

Environment policy of Autoklub Karosa Vysoké Mýto

Autoklub Karosa Vysoké Mýto deals with the organization of motorsports and other contests of all kinds, such as karting, motorcycles, cars, and cyclists. Furthermore, teaching traffic education on children's traffic playground, improving driving skill, and many other events associated with traffic education.

We realize that our activities are not isolated, but that we are part of the outside world, which we affect. Our aim is to contribute to the conservation of the natural environment and reserves of renewable resources for future generations.

Therefore, we decided to declare this new environmental policy

- We are committed to consistently comply with all obligations under the laws and regulations to protect the environment
- We are committed to a permanent improvement of our goals and the prevention of pollution.
- Our priority is to reduce waste production and increasing of their further use.
- We pay constant attention to the issue of efficient use of natural resources and energy
- We incite our suppliers for adhere to the principles of environmental management and provide our customers with information on environmentally sound management of waste.
- We improve the education of our employees to increase their environmental awareness and responsibility in protecting the environment
- Continuously improving our processes and working conditions so as to minimize their negative impact on the environment, safety and hygiene at work.

Management of Autoklub Karosa Vysoké Mýto is committed to provide adequate resources for environmental management and creating the conditions for the promotion and fulfilment of environmental policy. All employees are expected to actively contribute to the sustained implementation of the above principles within their competence and responsibility.
